### **Reasons For Allowance**

Prior art of record discloses a recording control apparatus comprising a maximum likelihood decoding section for performing maximum likelihood decoding of the digital signal, and generating binary signal representing a result of the maximum likelihood decoding; a reliability calculation section for calculating the reliability of the results of the maximum likelihood decoding. However, the prior art of record fails to disclose a recording control apparatus comprising a waveform rectification section for receiving digital signal reproduced from the recording medium; a maximum likelihood decoder performing maximum likelihood decoding of the digital signals having the waveform rectified; calculating the reliability of the result of the maximum likelihood decoding based on the digital signal having waveform rectified and the binary signal; and adjusting a shape of a recording signal for recording the information on the medium based on the calculated reliability as specifically recited in the claimed invention.
